*this book asks an important question often ignored by ancient historians and political scientists alike why did athenian democracy work as well and for as long as it did josiah ober seeks the answer by analyzing the sociology of athenian politics and the nature of communication between elite and nonelite citizens after a preliminary survey of the development of the athenian constitution he focuses on the role of political and legal rhetoric as jurymen and assemblymen the citizen masses of athens retained important powers and elite athenian politicians and litigants needed to address these large bodies of ordinary citizens in terms understandable and acceptable to the audience this book probes the social strategies behind the rhetorical tactics employed by elite speakers a close reading of the speeches exposes both egalitarian and elitist elements in athenian popular ideology ober demonstrates that the vocabulary of public speech constituted a democratic discourse that allowed the athenians to resolve contradictions between the ideal of political equality and the reality of social inequality his radical reevaluation of leadership and political power in classical athens restores key elements of the social and ideological context of the first western democracy*

vehicle rollover accidents have been a serious safety problem for the last three decades although rollovers are a small percentage of all traffic accidents they do account for a large proportion of severe and fatal injuries specifically some large passenger vehicles such as large vans pickup trucks and sport utility vehicles are more prone to rollover accidents with a high center of gravity cg and narrow track width vehicle rollover accidents may be grouped into two categories tripped and untripped rollovers a tripped rollover commonly occurs when a vehicle skids and digs its tires into soft soil or hits a tripping mechanism such as a curb with a sufficiently large lateral velocity on the other hand the untripped rollover is induced by extreme maneuvers during critical driving situations such as excessive speed during cornering obstacle avoidance and severe lane change maneuver in these situations the forces at the tire road contact point are large enough to cause the vehicle to roll over furthermore vehicle rollover may occur due to external disturbances such as side wind and steering excitation therefore it is necessary to investigate the dynamic stability and control of tripped and untripped vehicle rollover so as to avoid vehicle rollover accidents in this book different dynamic models are used to describe the vehicle rollover under both untripped and special tripped situations from the vehicle dynamics theory rollover indices are deduced and the dynamic stabilities of vehicle rollover are analyzed in addition some active control strategies are discussed to improve the anti rollover performance of the vehicle
