conspiracy theories are inevitable in complex human societies and while they have always been with us their ubiquity in our political discourse is nearly unprecedented their salience has increased for a variety of reasons including the increasing access to information among ordinary people a pervasive sense of powerlessness among those same people and a widespread distrust of elites working in combination these factors and many other factors are now propelling conspiracy theories into our public sphere on a vast scale in recent years scholars have begun to study this genuinely important phenomenon in a concerted way in conspiracy theories and the people who believe them joseph e uscinski has gathered forty top researchers on the topic to provide both the foundational tools and the evidence to better understand conspiracy theories in the united states and around the world each chapter is informed by three core questions why do so many people believe in conspiracy theories what are the effects of such theories when they take hold in the public what can or should be done about the phenomenon combining systematic analysis and cutting edge empirical research this volume will help us better understand an extremely important yet relatively neglected phenomenon

this monograph is an investigation of yahwistic votive practice during the hellenistic period the dedicatory inscriptions from the yahweh temple on mount gerizim are analyzed in light of votive practice in biblical literature and in general on the basis of a thorough terminological and theoretical discussion a special focus is laid on remembrance formulae which request the deity to remember the worshipper in return for a gift these formulae cannot only be found at gerizim but also in other semitic dedicatory inscriptions therefore these texts are interpreted in their broader cultural context placed within a broad religious practice of dedicating gifts to the gods and leaving inscriptions in sanctuaries finally the aspect of divine remembrance in the hebrew bible is explored and related to the materiality of the votive inscription the research concludes that there is a perception of the divine behind this practice on mount gerizim that ties together the aspects of gift remembrance and material presence this theology is echoed both in similar semitic dedicatory inscriptions and in the hebrew bible
