in the past three centuries the ship has developed from the relatively unsophisticated sail driven vessel which would have

been familiar to the sailors of the tudor navy to the huge motor driven container ships nuclear submarines and vast cruise liners that ply our seas today who were the innovators and builders who during that span of time prompted and instigated the most significant advances in the past three centuries the ship has developed from the relatively unsophisticated sail driven vessel which would have been familiar to the sailors of the tudor navy to the huge motor driven container ships nuclear submarines and vast cruise liners that ply our seas today who were the innovators and builders who during that span of time prompted and instigated the most significant advances in this new book the author describes the lives and deeds of more the 120 great engineers scientists philosophers businessmen shipwrights naval architects and inventors who shaped ship design and shipbuilding world wide covering the story chronologically and going back briefly even to archimedes such well known names as anthony deane peter the great james watt robert fulton and isambard kingdom brunel share space with lesser known characters like the luckless frederic sauvage a pioneer of screw propulsion who unable to interest the french navy in his tests in the early 1830s was bankrupted and landed in debtors prison with the inclusion of such names as ben lexcen the australian yacht designer who developed the controversial winged keel for the 1983 americas cup the story is brought right up to date concise linking chapters place all these innovators in context so that a clear and fascinating history of the development of ships and shipbuilding emerges from the pages an original and important new reference book

alongside full colour artwork this book reveals why glamorous but bloody single ship duels between britain and france have been immortalized in film and literature from horatio hornblower to jack aubrey

during the recent decades social political and academic endeavours have been made to improve environmental quality and

reduce pollution in particular the ocean sea and coastal areas show varying degrees of impact from the multiple human activities carried out in the terrestrial as well as in the aquatic environment ecology is a science which studies the relationship between organisms and the surrounding environment and in the modern era the marine world is getting increasing attention for centuries it has been the final reservoir of human garbage later it became an oil farm with a concomitant increase of coastal population growth and unplanned growth of the fishing industry and the increasing use of sea routes for cargo transport and recreational uses cruises all this led to rising contamination with negative effects on biota and even human health it is then imperative to know the current situation of the world s oceans that is the main purpose of this book to document at a glance the latest research in the field of ocean pollution

this book analyses the german defenses along the normandy beaches and describes how the allied forces overcame them on the morning of june 6 1944

this illustrated guide documents the development of the coastal air and land defense systems that served to protect pearl harbor and honolulu and seeks to understand why these failed at a critical point

an analysis of the famed medieval english tapestry through examination of the depicted landscapes towns castles and other structures an archaeological study of the bayeux tapestry provides a unique re examination of this famous piece of work through the historical geography and archaeology of the tapestry trevor rowley is the first author to have analyzed the tapestry through the landscapes buildings and structures shown such as towns and castles while comparing them to the landscapes buildings ruins and earthworks which can be seen today by comparing illustrated extracts from the tapestry to

historical and contemporary illustrations maps and reconstructions rowley is able to provide the reader with a unique visual setting against which they are able to place the events on the tapestry this approach allows rowley to challenge a number of generally accepted assumptions regarding the location of several scenes in the tapestry most controversially suggesting that william may never have gone to hastings at all finally rowley tackles the missing end of the tapestry suggesting the places and events which would have been depicted on this portion of william s journey to westminster praise for an archaeological study of the bayeux tapestry we all know what the bayeux tapestry celebrates in its iconic artwork but trevor rowley goes one step further and looks at the buildings and characters with a view actually identifying them absolutely fascinating brings a whole new dimension to the study of this amazing artefact books monthly rowley s arguments are copiously illustrated with details from the tapestry photographs and plans it results in very densely packed chapters well worth reading and you certainly will never look at that tea towel in the same way again hexham local history society

excerpt from text book of theoretical naval architecture this book has been prepared in order to provide students and draughtsmen engaged in shipbuilders and naval architects drawing offices with a text book which should explain the calculations which continually have to be performed it is intended also that the work and more especially its later portions shall serve as a text book for the theoretical portion of the examinations of the science and art department in naval architecture it has not been found possible to include all the subjects given in the honours portion of the syllabus such as advanced stability work the rolling of ships the vibration of ships etc these subjects will be found fully treated in one or other of the books given in the list on page 292 a special feature of the book is the large number of examples given in the text and at the ends of the chapters by means of these examples the student is able to test his grasp of the principles and processes
