the development of products in disciplines such as mechanical electrical or software engineering is a challenging task costs have to be reduced the time to market has to be shortened and quality has to be improved skilled engineers and sophisticated tools for supporting technical work are necessary prerequisites yet they are not sufficient for meeting these ambitious goals in addition the work of developers must be coordinated so that they cooperate smoothly to this end the steps of the development process have to be planned an engineer executing a task must be provided with documents and tools the results of development activities have to be fed back to management which in turn has to adjust the plan accordingly the documents produced in different working areas have to be kept consistent with each other etc this book reports on models and tools for managing development processes it provides both a survey of the current state of the art and presents our own contributions the material covered in this book is based on research in different engineering disciplines mechanical software and chemical engineering it presents a unified view on the management of development processes in these disciplines

the remarkable economic growth achieved by japan and korea makes analysis of the style of economic management practiced in each of special interest some similarities emerge specifically a strong partnership between government and the private sector an export oriented development strategy and emphasis on education and the development of skills the policies differed in that government became the more senior partner and the apparatus of planning and policy making was more centralized and streamlined in korea and korea relied much more on foreign trade although the experience of these two countries in general confirms that price markets and outward orientation can play a significant part in economic development their styles of economic management do not fall neatly into the conventional pigeonholes in economics no definitive conclusions as to transferability of the japanese and korean techniques emerge but some important inferences can be drawn from the experiences of japan and korea regarding the power of prices and role of competition both internal and external
