may 28 2021 i have recently come across the code gt in r it is a vertical line character pipe followed by a greater than symbol here is an example mtcars gt head what is the gt code

nov 25 2014 i have seen the use of gt percent greater than percent function in some packages like dplyr and rvest what does it mean is it a way to write closure blocks in r

3 days ago r is a free open source programming language and software environment for statistical computing bioinformatics information graphics and general computing

a carriage return r makes the cursor jump to the first column begin of the line while the newline n jumps to the next line and might also to the beginning of that line

the infix operator is not part of base r but is in fact defined by the package magrittr cran and is heavily used by dplyr cran it works like a pipe hence the reference to magritte s famous

```
library(magrittr)
1 %>% summarise(x = 1) %>% summarise(y = 2) %>% summarise(z = 3)
```

```
library(magrittr)
1 %>% summarise(x = 1) %>% summarise(y = 2) %>% summarise(z = 3) %>% summarise(w = 4)
```

r provides two different methods for accessing the elements of a list or data frame and what is the difference between the two and when should i use one over the other

for boolean values there s no difference between bitwise and logical operations but for arbitrary integers the result differs for instance 1 2 3 in most programming languages however this is

there are some differences between and in the past version of r or even the predecessor language of r s language but currently it seems using only like any other modern language python java
