this book gathers the proceedings of the 16th IFToMM World Congress which was held in Tokyo, Japan, on November 5-10, 2023, having been organized every four years since 1965. The congress represents the world's largest scientific event on mechanism and machine science. The contributions cover an extremely diverse range of topics including biomechanical engineering, computational kinematics, design methodologies, dynamics of machinery, multibody dynamics, gearing and transmissions, history of mechanisms, linkage and mechanical controls, robotics and mechatronics, micro mechanisms, reliability of machines and mechanisms, rotor dynamics, standardization of terminology, sustainable energy systems, transportation machinery, tribology, and vibration. Selected by means of a rigorous international peer review process, they highlight numerous exciting advances and ideas that will spur novel research directions and foster new multidisciplinary collaborations.

Management Accounting is a textbook for business management study programmes. It covers the international syllabus of cost accounting and controlling on Bachelor's and Master's levels. Prof. Berkau has more than 25 years of teaching experience in Germany (University of Osnabrück) and at international universities in South Africa, Malaysia, China, the Netherlands, and South Korea. The textbook strictly follows a case study-based approach. All methods are discussed by easily understandable cases. The calculations demonstrate how to apply management accounting step by step. In the first chapters, the case study Penor PLC, a British windows doors manufacturer, explains the differences between financial accounting (IFRS) and management accounting. In the next following sections, the textbook covers two points of view: 1. a controlling view with cost-volume-profit analysis, degree of operating leverage, investment appraisal, mergers and cross-border acquisitions, and risk valuation (Monte Carlo simulation); 2. a cost accounting view that covers management accounting systems, flexible budgeting, cost allocation methods, performance measurement, monitoring, reporting, product calculation, manufacturing accounting, job order and process costing, activity-based costing, target costing, and contribution margin accounting. On the UVK website, numerous exam tasks with complete solutions, further study materials, and links to video clips produced by Prof. Berkau are available for download.

Matthew Hindman reveals here that contrary to popular belief, the internet has done little to broaden political discourse in the United States, but rather that it empowers a small set of elites, some new but most familiar.
