an in depth overview of an emerging field that brings together high performance computing big data processing and deep learning over the last decade the exponential explosion of data known as big data has changed the way we understand and harness the power of data the emerging field of high performance big data computing which brings together high performance computing hpc big data processing and deep learning aims to meet the challenges posed by large scale data processing this book offers an in depth overview of high performance big data computing and the associated technical issues approaches and solutions the book covers basic concepts and necessary background knowledge including data processing frameworks storage systems and hardware capabilities offers a detailed discussion of technical issues in accelerating big data computing in terms of computation communication memory and storage codesign workload characterization and benchmarking and system deployment and management and surveys benchmarks and workloads for evaluating big data middleware systems it presents a detailed discussion of big data computing systems and applications with high performance networking computing and storage technologies including state of the art designs for data processing and storage systems finally the book considers some advanced research topics in high performance big data computing including designing high performance deep learning over big data dlobd stacks and hpc cloud technologies

work love and learning in utopia breathes new life into the age old human preoccupation with how to create a happier society with a fascinating mix of research from cross cultural psychology macro history and evolutionary biology the book gives new credibility to the advocacy of radical equality the author a psychological anthropologist argues that the negative emotions of sadness anger and fear evolved in tandem with hierarchy while happiness evolved separately and in connection to prosociality and compassion the book covers a wide range of human concerns from economics and education to media and communication to gender and sexuality it breaks new boundaries with its scope arguing that equality of love is as important and possible as is economic equality its argument is provocative yet practical and each chapter ends with concrete proposals that invite dialogue with any student of policy written in an easily accessible style this book will appeal to anyone who has ever puzzled over how our social world could be remade in particular it will be very useful to students and scholars of anthropology sociology and psychology

parenting can be the toughest journey a person ever makes the author transparently addresses the difficult parts of this role while pointing us to some practical ways of thinking and relating with children to lighten the responsibility this book is as fascinating as amy chuas battle hymn of the tiger mother memoir as relatable as jen hatmakers christian foibles as uplifting as iyanla vanzants inspirational messages and backed by solid research of the likes of brene brown by deftly combining four of americas favorite genres into one

enjoyable read the author does not force us to compare and choose one world view over another but honors all kim understands the unique challenges and opportunities that arise when youre parenting in a culture different than the one in which you were raised her words are wise and just what you need to figure out what is best for your family jill savage author of better together because youre not meant to mom alone this is an insightful book full of sound and practical advice i highly recommend it dr helen mendes love msw author of reflections on the upsides of aging kim gives invaluable insight on the intricacies of parenting in a more globalized and culturally relevant world while respecting tradition and heritage sam louie m a lmhc author of asian shame and addiction suffering in silence humorous yet educational this book is a must read for any parent erika olivares sumner life wellness coach mother of three

this volume provides the first study of the history of sinology aka china studies as charted across several communist states during the cold war the people s republic of china was created in the first years of the cold war with its early history and foreign policy intimately bound up in that larger geopolitical fight all the seismic changes in china s geopolitical landscape from its emergence and close relationship with the soviet union to the sino soviet split and the eventual rapprochement with the united states resulted in a great deal of interest by journalists politicians and scholars yet although scholars across the soviet bloc produced an impressive body of work on a range of sinological studies with rare exceptions most of those scholars and their work remains unknown outside their own intellectual circles this book redresses this dearth of knowledge of sinological scholarship providing invaluable and unique glimpses of soviet bloc sinologists and their work during the cold war including cutting edge research on lesser studied communist states such as poland hungary mongolia and others international in scope this book is ideal for scholars and researchers of modern history chinese studies sinology and the cold war

are humans violent or peaceful by nature we are both in this ambitious and wide ranging book agner fog presents a ground breaking new argument that explains the existence of differently organised societies using evolutionary theory it combines natural sciences and social sciences in a way that is rarely seen according to a concept called regality theory people show a preference for authoritarianism and strong leadership in times of war or collective danger but desire egalitarian political systems in times of peace and safety these individual impulses shape the way societies develop and organise themselves and in this book agner argues that there is an evolutionary mechanism behind this flexible psychology incorporating a wide range of ideas including evolutionary theory game theory and ecological theory agner analyses the conditions that make us either strident or docile he tests this theory on data from contemporary and ancient societies and provides a detailed explanation of the applications of regality theory to issues of war and peace the rise and fall of empires the mass media economic instability ecological crisis and much more warlike and peaceful societies the interaction of genes and culture draws on many different fields of both the social sciences and the natural sciences it will be of interest to academics and students in these fields

including anthropology political science history conflict and peace research social psychology and more as well as the natural sciences including human biology human evolution and ecology

21st century sociology a reference handbook provides a concise forum through which the vast array of knowledge accumulated particularly during the past three decades can be organized into a single definitive resource the two volumes of this reference handbook focus on the corpus of knowledge garnered in traditional areas of sociological inquiry as well as document the general orientation of the newer and currently emerging areas of sociological inquiry

drawing on the work of leading scholars as well as policy makers and analysts this volume offers the most comprehensive and accessible exploration to date of the major puzzles issues and questions surrounding the complex and increasingly visible role of religion in world affairs

exploring the multiracial multiethnic
