is globalization leading us toward a world of fewer and fewer currencies and consequently simplified monetary management many specialists believe this is the case as the territorial monopolies national governments have long claimed over money appears to be eroding in the future of money benjamin cohen argues that this view which he calls the contraction contention is

wrong rigorously argued written with extraordinary clarity and thoroughly up to date this book demonstrates that the global population of currencies is set to expand greatly not contract making monetary governance more difficult not less at the book's core is an innovative theoretical model for understanding the strategic preferences of states in monetary management should governments defend their traditional monetary sovereignty or should they seek some kind of regional consolidation of currencies the model offers two broad advances first whereas most scholarly work evaluates strategic options individually or in comparison to just one other alternative this model emphasizes the three dimensional nature of the decisions involved second the model emphasizes degrees of currency regionalization as a central determinant of state preferences Cohen also systematically explores the role of the private sector as an alternative source of money the book concludes with two key policy proposals first fiscal policy should be resurrected as a tool of macroeconomic management to offset the present day erosion in the effectiveness of monetary policy second the international monetary fund should more actively help coordinate the decentralized strategic decision making of governments the future of money will be perilous but by mapping out the alternative policies countries can follow the future of money shows it need not be chaotic
